

Scrub Solution

Good Morning, _____.

I just completed my weekly Sani-Service and if you have just a minute, would you like to inspect my work?

(NOTE: If manager/owner does not wish to visit restroom, proceed to narrative after step 6)

It is a 6-step process:

1. I maintain your air fresheners.
2. I manage and refill all your hand soap dispensers.
3. I clean or replace your urinal screens.
4. I use Blue Planet HIOX to clean, sanitize and disinfect the toilets, sinks and urinals.
5. I apply our Sani-Shield protective barrier to your toilet, sinks and urinals.
6. Finally, I apply our Sani-Guard process using an electrostatic sprayer.

In performing the service, I noticed that the tiles and grout under the urinals are urine splashed and discolored. This can cause odor and customers can track urine, germs, etc., on their shoes throughout your facility, is this a concern?

I ask, as part of my job is to look out for my customers; helping them improve the appearance within their facility by combating; germs, bacteria, and odors, all while saving them money.

Were you aware, every time a toilet or urinal is flushed particles go airborne hovering for 2 1/2 hours and spreads up to 20 feet? All this ends up on your floor.

- Mopping does not remove this contamination; it embeds it deep into the floor.
- Studies show that 80% of the restroom's odors come from your floor.
- The floor is a major source of cross-contamination that is spread throughout your facility – threatening your customers and employees.

We want to protect you and your business and provide a fresh smelling, sanitary restroom experience for your customers and employees and our Scrub Technician is professionally trained.

1. Our Tile and Grout Cleaning Service uses specialized equipment with commercial grade extractors and low water pressure that's specifically designed to remove buildup in tile and grout.
2. We'll use the product best suited for the tile in your facility safely removing buildup and eliminate breeding ground for germs, reduce the spread of disease, and keep your tile floors and walls looking fresh, clean, and safe in the process.
3. By removing this buildup, we not only remove hazardous grease but also reduce odors you may not realize are coming from your tile floors.

Our Scrub Service does the things your cleaning staff cannot do. Our service literally kills the germs that kill your business.

Do you see any reason you wouldn't want this service?
